

# ADS Pavilion at DSEI 2025

The World Leading Defence and Security Event

ADS Pavilion sponsored by:  
**Wincanton**

*Securing  
UK advantage*

# UNLOCKING BUSINESS ADVANTAGE

ADS represents businesses operating in the aerospace, defence, security and space sectors. Our dedicated team is here to connect our members to business opportunities that support growth and convene activity that contributes to the growth of our sectors.

## MEMBER BENEFITS

- Reach **international opportunities**
- Access **sector expertise** & networking
- Gain valuable **business development** support
- Increase **stakeholder exposure** & influence
- Unlock funding programmes & **cost-effective solutions**
- **Representation** on issues impacting our sectors
- Enjoy **exclusive** member offers

[adsgroup.org.uk](http://adsgroup.org.uk)

## About ADS

ADS represents and supports over 1500 UK businesses operating in the aerospace, defence, security and resilience, and space sectors.

Our members are the custodians of a world-leading advanced engineering and services workforce and range from major multinational businesses with substantial UK presences, to hundreds of small and medium sized companies in every part of the country.

Joining ADS offers access to business development support through our programme of in-person and digital events and expertise in specialist areas such as supply chain excellence, public procurement, and research funding.

Our policy work helps to create the environment that allows our members to invest in productivity, exports, and growth. We work with local, regional, and national Government departments and agencies in the UK, and with other European and international organisations involved in setting and implementing policies that impact our sectors.

Over 40 ADS Special Interest Groups provide specialist and exclusive networks of like-minded stakeholders to seek out new business opportunities, learn and influence markets and keep up to date with industry developments specific to your interests and objectives.

[adsgroup.org.uk](http://adsgroup.org.uk)

# Foreword

It gives us great pleasure to extend a very warm welcome to our sell-out ADS Pavilion at DSEI 2025, where over 180 businesses have joined us to showcase our outstanding defence industry.

In 2024, the UK defence sector generated £36.4 billion in turnover, over a third of which was generated by exports. With a workforce of over 180,000 highly skilled people, delivering £15 billion in value add to the UK economy, over the course of this week, you will have the opportunity to meet with many of those businesses who are responsible for this growth.

For this year's pavilion, we're delighted to bringing together primes, small to medium-sized enterprises (SMEs), academia, and government partners alike. Over the course of your visit, you will see innovations that range from electric control systems used to power an entire fighter jet down to the sealing solution that secures it into place. As you view the exhibits and meet colleagues from the UK, you will get a sense of the breadth of capabilities the UK has on offer and why our defence sector remains a true success story among the UK's advanced manufacturing industries.

In the UK, we are privileged to enjoy a close partnership between industry and government that supports and enables our continued success. On the 26 March 2025, we saw the commitment to increase our defence spending to 2.5% of GDP. Coupled with recent announcements in supporting our hub of world-class SMEs, funding for new innovations in defence equipment, and a package of support for the UK's NATO-first agenda, it's clear the UK will long remain an attractive location for investment within the defence sector.

Throughout the week, the ADS team will be actively engaged in keynote sessions, panel discussions, and networking receptions – highlighting the critical importance of international collaboration across our sectors. We invite you to visit the ADS Pavilion, where our team is on hand to connect you with leading exhibitors and provide insights into the UK's thriving aerospace, defence, security, and space industries. Our dedicated lounge is available to support meaningful conversations and facilitate new partnerships. We also encourage you to explore our latest ADS Facts & Figures publications, showcasing the immense economic contribution our sectors make to the UK.

We wish you a successful DSEI 2025 and hope that UK industry will remain your long-term partner.

**Kevin Craven**  
CEO, ADS

**Samira Braund**  
Defence Director, ADS

# Events 2025 - 2027

## ARX Robotics

### Giles Buchanan

Mission Operations Lead UK

71-75, Shelton Street, Covent Garden,  
London, WC2H 9JQ, UK

+44 (0) 7914 406327  
giles.buchanan@arx-robotics.com  
arx-robotics.com

ARX Robotics develops autonomous, uncrewed systems and enables the digital transformation of land forces.

ARX's UGVs are built according to the ARX Robotic Framework, an innovative approach which combines modular platform structure, software-enabled hardware and scalable autonomy. This leverages the transformative potential of robotics and AI to reshape the capabilities of land forces, delivering flexibility, upgradability and attritable mass.

Mithra OS, ARX's operating system, equally enables legacy vehicles to be upgraded into intelligent, connected units by integrating sensor systems and autonomy.

ARX has the largest Western UGV deployment in Ukraine and its systems are deployed with multiple European armed forces.

### SECURE MISSION COMPUTERS ENABLING CONNECTED MILITARY SYSTEMS

Integrators of modern defence systems face an ever-increasing need to computation and bandwidth, while they struggle with shrinking budgets and deployment schedules. With Kontron, defence contractors can depend on a global supplier of feature-rich and technically advanced solutions achieved through decades of experience engineering rugged, high performance mission-critical computers. Satisfying the most demanding defence computing requirements, Kontron excels at delivering COTS application-ready platforms and customized systems specifically designed to accelerate time to deployment. Kontron is also a driving force in evolving standards such as OpenVPX, SOSA™, VICTORY, and COM-HPC, which defence system integrators depend on for interoperability and ease of integration.

At Kontron, we strive to become the leading global IoT company and a pioneering force, developing secure, sustainable, and cutting-edge technologies.

**Jennifer Levine**  
Head of EMEA Marketing

3, Canal Quay, Newry, Co. Down  
BT35 6BP, UK

+44 (0) 7464 447533  
jlevine@kx.com  
kx.com

KX delivers ultra-fast, secure analytics for aerospace, defense, space, and security organisations, combining historical, real-time, structured, and unstructured data for mission-critical insight. Our time-series database, proven for over two decades, supports edge deployments, air-gapped environments, and cloud or on-asset flexibility. With Python, SQL, ML, and AI integration, KX enables rapid application development in days. Capabilities include sensor monitoring, real-time asset tracking, and multi-source event correlation, enhancing situational awareness and accelerating research analytics. In partnership with Lockheed Martin's Skunk Works, KX powers UK-sovereign situational awareness platforms advancing Combined Joint All-Domain Command and Control (CJADC2) capabilities.

Sales Director

4, Prince Regent Road, Belfast,  
BT5 6QR, UK

+44 (0) 2890 706940  
campbell@laserproto.com  
laserproto.com

As a leading AS9100 provider of advanced 3D Printing and AM services, we have extensive experience in delivering high-quality, precision-engineered components.

Aligned with the demands of the defence sector, these are supported by full FAI reports, CofC, material traceability etc. as well as lab testing, heat treatment and post machining.

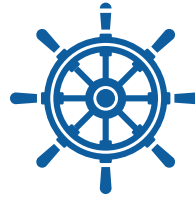

A preferred supplier to several UK based defence primes and SMEs, we offer a full turnkey solution to companies looking for an AM solution.

Our services include: Metal Sintering (DMLS) SLA, SLS, CNC, HPS, DLP

LPE brings over 30 years experience to help produce lightweight, high performance on demand parts with minimal material waste, aligning with MOD efficiency and sustainability goals.

As specialists in delivering innovation, resilience and operational excellence, we can help companies adopt AM, driving tangible benefits across the defence supply chain.

Windmill House, 277, Tong Road,  
Leeds, LS12 4NQ, UK

+44 (0) 1132 308450  
ashwain.rayit@sarastech.co.uk  
sarastech.co.uk

SARAS Technology is a leading European designer and manufacturer of RF and Microwave components including Amplifiers, Filters and RF Subsystems. (Complete RF Front End)

From our UK base we supply high quality, ITAR free, solutions to a range of Defence, Aerospace, Space and Communication global markets.

Our standard products and solutions cover frequencies from VHF through to 20GHz and beyond and include:

- High Power Linear Amplifiers for Complex modulation waveform application
- High Power Radar Transmit/Receive Modules
- LTE/5G solutions to the defence community.
- Filters, Multiplexers and Switched Filter banks
- RF Front End Modules (FEM)
- SSPAs (L/S/X Band)
- OEM and Custom RF/Microwave Products

# ***Wincanton***

Enabling defence through logistics for 60 years

Wincanton ensures complex defence supply chains deliver certainty, agility and compliance for leading defence organisations.

- Inbound to manufacturing
- End-to-end compliance
- Materials care and protection
- Multimodal transport
- Through life support & MRO
- Secure warehousing & packaging

## EXHIBIT WITH ADS

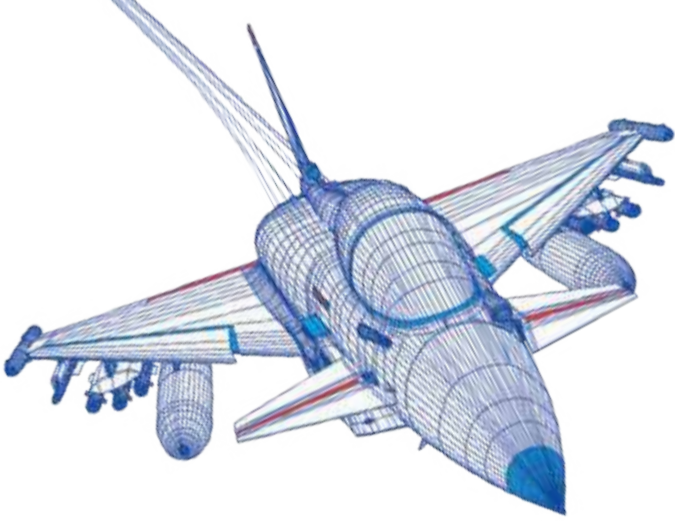

### BENEFITS OF EXHIBITING ON THE UNITED KINGDOM PAVILION

- » Full access to the ADS UK Pavilion lounge, including informal meeting space and hospitality facilities
- » Gain enhanced exposure to government delegations, high-ranking officials, and decision makers
- » Dedicated ADS Event Manager to assist with pre, onsite and post event management
- » Onsite visibility exhibiting under the 'United Kingdom Pavilion' high branding
- » Featured in the tailor-made UK Pavilion brochure that is available onsite
- » Access to any UK specific receptions that may occur surrounding the event
